## Suburban traveling

### Short-term tickets for travelling outside Prague

- Valid on all PID lines  (apart from the line AE)
- Validity is limited by time and by the number of zones passed during the travel
- The area of Prague is calculated as 4 tariff zones P+0+B (the zone P is doubled)
- The area of Central Bohemian region is divided into zones 1 to 7 - **Kladno is included in zone 3** - so you need ticket for 7 zones (4 zones in Prague and 3 zones to Kladno)

When you buy a [ticket for suburban travelling](#), the ticket has limit on time and on number of zones. These are the only limitations, otherwise the ticket is fully transferable. When you travel, all zones that you go through are calculated, even though the line does not stop in that zone. The zones are adjacent in this order: P, 0, B, 1, 2, 3, 4, 5, ..., or ..., 5, 4, 3, 2, 1, B, 0, P. For instance, if you go by a suburban line from zone 3 to zone B, where you change to an urban line and continue to the city, you always need to have a ticket for at least 7 zones (3, 2, 1, B, 0 and P, which is calculated as two individual zones).
